## Introduction

The Climate Investment Funds (CIF) were established in 2008 and comprise of the Clean Technology Fund (CTF) and the Strategic Climate Fund (SCF). CTF provides resources to scale up low-carbon technologies with a significant potential for long-term greenhouse gas emissions savings. The World Bank, as Trustee, has established and administers the CTF Trust Fund. On March 22, 2022, the CTF Trust Fund Committee (TFC) approved the establishment of the CTF Parallel Fund, a parallel and associated fund of the CTF, to be established and administered by the Trustee along with the CTF Trust Fund. The CTF Parallel Fund was established to receive new loan contributions to CTF. Both the CTF Trust Fund and the CTF Parallel Fund are for the achievement of the same CTF objectives and governed by the same CTF TFC. For this report, the CTF Trust Fund and the CTF Parallel Fund are referred to collectively as the CTF Trust Fund. The CTF funds are disbursed through the Multilateral Development Banks (MDBs) to support effective and flexible implementation of country-led programs and investments. The MDBs are the African Development Bank (AfDB), the Asian Development Bank (ADB), the International Bank for Reconstruction and Development (IBRD)/International Development Association (IDA) (the World Bank), and the International Finance Corporation (IFC).

The World Bank acts as Trustee for the CIF. This report is produced by the Trustee based on financial information as of August 31, 2023, in accordance with the Trustee's role as set forth in the Governance Framework for the CTF which states:

"The Trustee will provide to the CTF Trust Fund Committee regular reports on the financial status of the Trust Fund, as agreed between the Trustee and the CTF Trust Fund Committee."

This report provides (i) a snapshot of the financial status of the CTF Trust Fund as of August 31, 2023; (ii) highlights of activities between April 1, 2023, and August 31,2023; (iii) the status of pledges and contributions, and (iv) the details of financial activities of the CTF Trust Fund.

## 2. Asset Mix and Investment Income and ESG Summary Report

The undisbursed cash balance of the CTF Trust Fund is maintained in a commingled investment portfolio ("Pool") for all trust funds managed by IBRD. The Pool is managed actively and conservatively with capital preservation as the overarching objective.

#### ASSET MIX

CTF Trust Fund assets are invested across three of the World Bank Trust Fund's investment model portfolios, that are predominantly fixed income: "Model Portfolio 0" for short-term working capital needs, "Model Portfolio 1" with an investment horizon of one year, and "Model Portfolio 2" with a broader investment universe and an investment horizon of three years. The investment objectives for the CTF Trust Fund are to optimize investment returns subject to preserving capital and maintaining adequate liquidity to meet foreseeable cash flow needs, within a conservative risk management framework<sup>2</sup>. Although actual future returns will depend on market conditions, the Trust Fund Investment Pool is actively monitored and adjusted to preserve development partner funds over the investment horizons. Over shorter periods, however, market volatility may result in negative actual or 'mark-to-market'<sup>3</sup> returns. Overall, the CTF Trust Fund cumulative returns have been driven by its investment in longer-term model portfolios, which may be exposed to higher volatility in returns over shorter periods but are expected to have higher returns over longer periods.

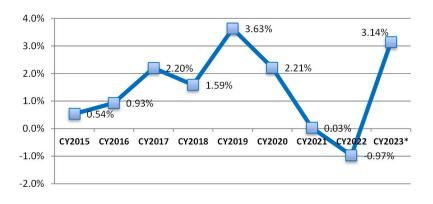

As of August 31, 2023, the portfolio allocation by asset class has the largest allocations to government securities, mortgage-backed securities (MBS), agency and covered bonds.

<sup>&</sup>lt;sup>2</sup> Risk tolerance is defined as the expected maximum loss, as measured by the Conditional Value-at-Risk (CVaR), at the portfolio's investment horizon, not to exceed 1% at portfolio's investment horizon, with 99% confidence.

<sup>&</sup>lt;sup>3</sup> Mark-to-market gains or losses represent unrealized gains or losses resulting from changes in the value of securities in the portfolio which have not yet been sold.

continues to remain duration neutral.

#### **INVESTMENT RETURNS**

Investment portfolio for CTF generated positive returns for CY2023 until August 31, 2023. Portfolio performance during the period was driven by the interest rate path dictated by the US Federal Reserve Bank decisions that signaled that the monetary policy rates will remain restrictive for longer duration until inflation returns to target. Guidance from the Fed that remained data dependent lead to rise in medium- and long-term U.S. Treasury yields and continued steepening of the yield curve from the historic levels of inversion. As a result, the portfolio positioning

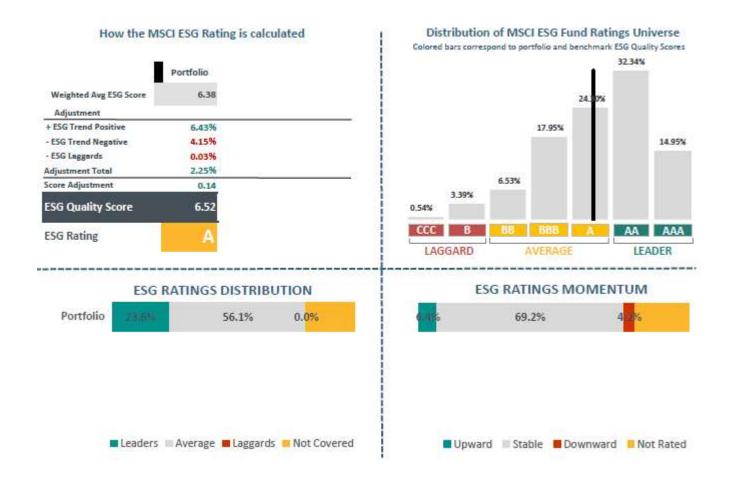

#### ESG SUMMARY REPORT – CLEAN TECHNOLOGY FUND INVESTMENT PORTFOLIO

The funds held in trust benefit from the approach to Sustainable and Responsible Investment (SRI), as defined in the Trustee's Sustainable and Responsible Investment (SRI) Statement, which considers and incorporates Environmental, Social, and Governance (ESG) factors into Trustee's investment processes. The implementation of ESG Integration falls within the purview of existing authorizations by the World Bank Board. Based on the endorsement by the World Bank management, starting from July 2019, the Trustee has applied ESG Integration as the default SRI approach for all portfolios managed by the World Bank, including for the Clean Technology Fund assets. Considering and incorporating ESG factors into investment processes should, all things being equal, lead to portfolios that have stronger ESG profiles compared to portfolios that do not explicitly consider these ESG issues. ESG Integration has become part of the existing investment processes and is intended to help fulfil the existing investment objectives. The application of ESG Integration as part of the investment process would not involve any changes in the current investment objectives or risk limits for the Clean Technology Fund portfolio. The CTF investment portfolio is primarily comprised of short-to-medium term high grade fixed - income securities (sovereign, supranational and agency securities, and bank deposits), and as of June 2023, the portfolio has an ESG Quality Score<sup>[1]</sup> of 6.52 and an ESG Rating<sup>5</sup> of A. Based on its ESG positioning in the MSCI ESG Fund Ratings Universe (upper right of Figure 1), which is deemed to be the more consistent reference indicator, CTF's investment portfolio currently situated among the top of ESG Average. This continues to reflect-relatively-high capability of CTF portfolio's holdings in terms of managing its exposures to material ESG risks and opportunities arising from Environmental, Social and Governance factors, as well as its strong resilience to long-term financially relevant ESG risks.

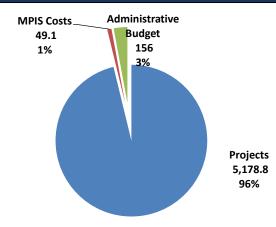

<sup>&</sup>lt;sup>[1]</sup> ESG Quality Score is based on MSCI ESG Ratings and measured on a scale of 0 to 10 (worst to best) following a rule-based methodology. ESG Ratings Momentum represents the percentage of a portfolio's market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment. The ESG Quality Score is calculated as a weighted average of ESG scores of individual holdings adjusted by ESG Ratings Momentum and ESG laggards (if any). The weight applied to the individual ESG scores is determined by the portfolio weight of individual holdings as of the reporting date. Based on the above, the ESG Quality Score, which is subject to potential skewing effect from any factor in the calculation, could slightly vary between different reporting dates along with changes in individual holdings and their portfolio weights as well as changes in ESG Ratings Momentum. Please see details on MSCI ESG Ratings Methodologyhttps://www.msci.com/esg-and-climate-methodologies
