## Introduction

The Global Partnership for Education Fund (GPEF) was established as a Financial Intermediary Fund in 2011 as part of the rebranding process of the Education for All-Fast Track Initiative (EFA-FTI), which started in 2002. The World Bank acts as the Trustee for the GPEF.

The Trustee provides administrative and financial services to the GPE Board and Contributors by receiving contributions from Contributors, investing liquid assets pending cash transfer, and transferring funds to Grant Agents. Working closely with the GPE Secretariat, the Trustee also records funding decisions made by the GPE Board.

The Trustee is required to provide periodic reports to the Board on the financial status of the Trust Fund<sup>1</sup>. This report is prepared based on financial information as of March 31, 2023. It also provides updates to business events until the date of the publication of this report.

<sup>1</sup> The Trustee's financial status reports are publicly available at: [www.worldbank.org/fiftrustee](http://www.worldbank.org/fiftrustee).

### 3. Investment Management

#### ASSET MIX<sup>5</sup>

GPEF Trust Fund assets are invested across three of the World Bank Trust Fund's investment model portfolios, ("Model Portfolio 0" for short-term working capital needs, "Model Portfolio 1" with an investment horizon of one year, and "Model Portfolio 2" with a broader investment universe and an investment horizon of three years). Overall, the GPEF Trust Fund cumulative returns have been driven by its investment in longer-term model portfolios, which may be exposed to higher volatility in returns over shorter periods but are expected to have higher returns over longer periods. By asset class, the largest allocations as of March 31, 2023, are to government securities, cash and equivalent investments, and covered bonds.

#### INVESTMENT INCOME

The GPEF Trust Fund liquid portfolio (which totaled approximately USD 1,203.2 million at end-March 2023) generated an investment return of 1.29% during the first quarter of 2023. The portfolio has earned approximately USD 122 million in investment income since inception. Investment performance of the portfolio was positive during the quarter though the markets witnessed the most turbulent and volatile period since the start of the pandemic or the great financial crisis owing to the weaknesses in the banking sector which led to the collapse of the SVB and resulted in the acquisition of Credit Suisse Bank by UBS. Stress in the Banking sector led to flight to quality sentiment in the market which was positive for the fixed income portfolios. The portfolio positioning remains duration neutral and the current valuations look positive for long-term portfolios.

#### FOREIGN EXCHANGE (FX) RISK MANAGEMENT

In June 2022, the GPE Board provided approval for the Trustee to move forward with developing the proposal on a Pilot basis, for implementation in early 2023. Since June 2022, the Trustee has developed all aspects of the FX management proposal, including financial management and accounting, systems capabilities, changes to GPE Fund governance and donor Contribution Agreements, and policies related to donor receivables, trading and collateral management. The proposal has been approved by the World Bank's Finance and Risk Committee as a pilot for the GPE Fund, and was subsequently endorsed by the GPE FRC in April 2023 for the GPE Board's approval in June 2023. Implementation is expected to begin after GPE Board's approval in June and amendments to GPE donor contribution agreements.

<sup>5</sup> The Corporate Securities category includes AAA-rated Euro Agency and government bonds/notes only and does not include corporate bonds.

## ESG SUMMARY REPORT – GPEF INVESTMENT PORTFOLIO

As per the investment management strategy implemented by the World Bank, the funds held in trust benefit from the approach to Sustainable and Responsible Investment (SRI), which considers and incorporates Environmental, Social, and Governance (ESG) factors into Trustee's investment processes. The implementation of ESG Integration falls within the purview of existing authorizations by the World Bank Board. Based on the endorsement by the World Bank management, starting from July 2019, the Trustee has applied ESG Integration as the default SRI approach for all portfolios managed by the World Bank, including for the GPEF Trust Fund assets.

Considering and incorporating ESG factors into investment processes should, all things being equal, lead to portfolios that have stronger ESG profiles compared to portfolios that do not explicitly consider these ESG issues. ESG Integration has become part of the existing investment processes and is intended to help fulfil the existing investment objectives. The application of ESG Integration as part of the investment process would not involve any changes in the current investment objectives or risk limits for the GPEF Trust Fund portfolio.

The GPEF investment portfolio is primarily comprised of short-term high-grade fixed-income securities (sovereign, supranational and agency securities and bank deposits), and as at March 31, 2023, the portfolio has an ESG Quality Score\* of 7.28 and an ESG Rating\* of AA. Based on its ESG positioning in the MSCI ESG Fund Ratings Universe (upper right of Figure 1), which is deemed to be the more consistent reference indicator, GPEF's investment portfolio falls in the top decile of the ratings universe. This reflects capability of GPEF portfolio's holdings in terms of managing key medium to long term risks and opportunities arising from Environmental, Social and Governance factors.

*\* Note: ESG Quality Score is based on MSCI ESG Ratings and measured on a scale of 0 to 10 (worst to best) following a rule-based methodology. ESG Ratings Momentum represents the percentage of a portfolio's market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment. The ESG Quality Score is calculated as a weighted average of ESG scores of individual holdings adjusted by ESG Ratings Momentum and ESG laggards (if any). The weight applied to the individual ESG scores is determined by the portfolio weight of individual holdings as of the reporting date. Based on the above, the ESG Quality Score, which is subject to potential skewing effect from any factor in the*

calculation, could slightly vary between different reporting dates along with changes in individual holdings and their portfolio weights as well as changes in ESG Ratings Momentum. Please see details on MSCI ESG Ratings Methodology [here](#).
