HIGHLIGHTS FOR THE PERIOD APRIL 1, 2014 THROUGH JUNE 30, 2014:

- The Trustee executed a donation agreement with Finland for EUR 5 million, and the amount was received in the Adaptation Fund Trust Fund.
- Austria's EUR 500,000 contribution was received during the period.

3. Asset Mix and Investment Income

The undisbursed cash balance of the Adaptation Fund Trust Fund is maintained in a commingled investment portfolio (“Pool”) for all trust funds managed by IBRD. The Pool is actively managed so that the probability of incurring negative returns is no more than 1% over the applicable investment horizon.

ASSET MIX

The portfolio allocation by asset class has the largest allocations to government securities and money-market instruments. In 2012, the Adaptation Fund Board approved an updated investment strategy, reflecting the Fund’s mandate, current risk profile and projected liquidity needs. Based on projections that the Fund’s resources would remain undisbursed for at least one year and at a sizable level (above USD 100 million), its balance would be eligible for investment in a longer term tranche.

INVESTMENT RETURNS

The portfolio’s performance continues to be modest as the level of fixed income yields remain at near historically low levels. Contributors to performance were Agency MBS, the LIBOR portfolio, and sovereign bonds in the United States and Europe.
