Introduction

The Global Concessional Financing Facility (GCFF) was established in July 2016 as part of the *New Financing Initiative to Support the Middle East and North Africa (MENA) Region* which aims to provide additional financing on more favorable terms to countries in the MENA region impacted by forced displacement, conflict and economic instability. In September 2016, the GCFF was expanded to a global facility in order to provide middle income countries the development support needed to address refugee crises across the globe.

This report covers the financial status of the GCFF Trust Fund, and is produced by the Trustee (World Bank) in accordance with the Trustee's role in the GCFF Operations Manual and Standard Provisions for the Contribution Agreements/Arrangements (Section 6):

“The Trustee will maintain separate records and ledger accounts with respect to the funds deposited in the Trust Fund and transfers made therefrom. The Trustee will report to the Steering Committee semi-annually on the financial status of the Trust Fund, including information on the status of Contributions, investment income, Allocations, Commitments, transfers and funds available for approval by the Steering Committee.”

3. Asset Mix and Investment Income

ASSET MIX

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. Funds are managed such that the expected maximum loss, as measured by the CVaR, at the portfolio’s investment horizon, is not to exceed 1% with 99% confidence.

The portfolio allocation by asset class has the largest allocations to government securities and money-market instruments.

Note: The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio. These hedges remain in place.

Mortgage Backed Securities allocation includes To-Be-Announced (TBA) contracts for which only Mark-to-market (MTM) is used to calculate the value of the position which, as a result, could be negative.

INVESTMENT RETURNS

The GCFF funds are invested in accordance with the investment strategy established for all trust funds administered by the World Bank. The GCFF funds are invested in a short-term fixed income portfolio with an investment horizon of one year. The GCFF Trust Fund portfolio earned approximately USD 5.65 million in investment income since inception.
