The Trustee will report to the Steering Committee semi-annually on the financial status of the Trust Fund, including information on the status of Contributions, investment income, Allocations, Commitments, transfers and funds available for approval by the Steering Committee."

### 3. Asset Mix and Investment Income

#### **ASSET MIX**

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the "Pool") for all trust funds administered by the World Bank. On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. Funds are managed such that the expected maximum loss, as measured by the CVaR, at the portfolio's investment horizon, is not to exceed 1% with 99% confidence.

The portfolio allocation by asset class has the largest allocations to government securities, agency, corporates, and asset backed securities.

<u>Note:</u> The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio.

#### **INVESTMENT RETURNS**

The GCFF funds are invested in accordance with the investment strategy established for all of the trust funds administered by the World Bank. The GCFF funds are invested in a short term fixed income portfolio with an investment horizon of one year. The GCFF Trust Fund portfolio earned approximately USD 0.11 million in investment income since inception.
