Introduction

The information contained in this report is prepared based on financial information as of September 30, 2024.

The CGIAR Trust Fund (the “Fund”) was established as a Financial Intermediary Fund (FIF) in March 2017, through a Trustee Agreement between the World Bank as Trustee and the CGIAR System Organization. The Fund is administered by the World Bank as Trustee, and governed by the System Council, a representative body of Funders, Centers and other stakeholders. The Fund operates through three Windows: Window 1 funds are used as determined by the System Council; Window 2 funds are directed by Funders to eligible CGIAR Research Program (CRP); and Window 3 funds are directed by Funders to individual CGIAR Centers. In addition, the Fund has a Provisional Account which is used for contributions which a Funder has not designated a specific Window.

This report is produced by the Trustee in accordance with the Trustee’s role in the CGIAR Trust Fund as set forth in the Trustee Agreement section 9 which states:

“The Trustee shall maintain separate records and ledger accounts in respect of the funds deposited in the Trust Fund account and transfers made therefrom. Unless otherwise agreed between the Trustee and the System Management Office (following the System Management Office’s consultation with the System Council and the System Management Board, as appropriate), the Trustee shall provide a quarterly report to the System Management Office and the Funders on the receipts in, transfers from and fund balance of the Trust Fund in the relevant Holding Currency. The System Management Office shall forward such report to the System Council and the System Management Board. The System Organization shall also make such report available on its website.”

4. Cumulative Resources

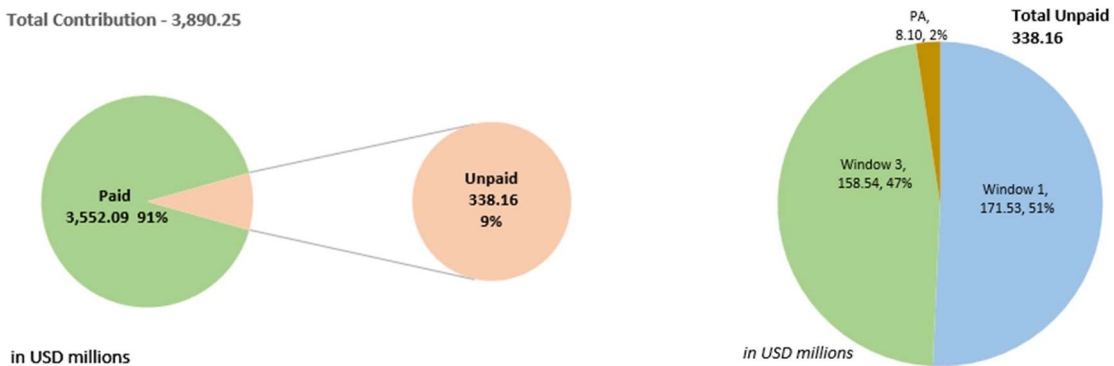

FUNDER CONTRIBUTIONS BY WINDOW

Funder and CGIAR System Organization contributions totaled USDeq. 3,890.25 million as of September 30, 2024, of which 51 percent were allocated to Window 3.

STATUS OF FUNDER CONTRIBUTION PAYMENTS

Of the USDeq. 3,890.25 million contributed by funders and CGIAR System Organization, USDeq. 3,552.09 million or 91 percent are paid-in and USDeq. 338.16 million or 9 percent is yet to be received. Out of the unpaid contributions of USD 338.16 million, 51% is for Window 1.

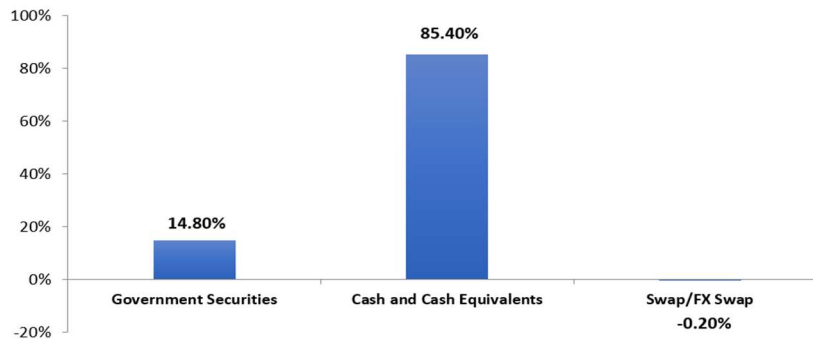

5. Asset Mix and Investment Income

ASSET MIX

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. The assets in the Pool are managed in accordance with the investment strategy established for all trust funds administered by the World Bank. Given the unpredictability of CGIAR Trust Fund inflows and outflows, CGIAR liquidity balances cannot be currently invested in longer-term portfolios. The fund resources are invested in cash portfolio of the World Bank’s Trust Fund investment pool that comprises bank deposits and investments in money market instruments with an investment horizon of less than 3 months.

INVESTMENT RETURNS

Fixed income portfolio performance was positive during the third quarter of CY2024. Third quarter of calendar year 2024 was marked by heightened volatility across the markets, as investors navigated mixed signals from a cooling labor market and a pivotal Federal Reserve policy decision. The Federal Open Market Committee (FOMC) opted for an aggressive start to the easing cycle with a 50bps cut, sending front-end yields and the USD sharply lower. However, as market participants absorbed the hawkish tone in the Summary of Economic Projections (SEP), long-end rates reversed earlier gains. By the end of the quarter, the U.S. 2-year yield had settled at 3.64%, while the 10-year yield closed at 3.78%. Economic indicators reflected a softer labor market, declining inflation, and solid economic growth, with second-quarter real GDP increasing by an annualized 3%. Despite the easing, the Federal Reserve maintained a hawkish stance in SEP, lowering expectations for further aggressive cuts and signaling the possibility of two more 25bps reductions by year-end. The fixed income portfolios continue to be duration neutral to the benchmark.

*non-annualized

The returns from the liquid assets portfolio managed by the Trustee were 1.4% during the third quarter of calendar year, 4.23% for the calendar year until September 30, 2024, with an investment income of USD 1.3 million approximately. As of June 30, 2024, the CGIAR Trust Fund has earned investment income of approximately USD 14.1 million on the undisbursed balance of the CGIAR Trust Fund.
