## Introduction

The GAFSP Trust Fund (“Trust Fund”) was established as a Financial Intermediary Fund (FIF) in April 2010 in the World Bank. The GAFSP is a multilateral mechanism to assist in the implementation of pledges made by the G20 in Pittsburgh in September 2009. The objective is to address the underfunding of country and regional agriculture and food security strategic investment plans already being developed by countries in consultation with contributors and other stakeholders at the country-level. The GAFSP operates through two windows: Public Sector Window and Private Sector Window. The Public Sector Window is managed under the Trust Fund while the Private Sector Window is managed by the IFC. This report covers only the Public Sector Window.

The report is produced by the Trustee in accordance with the Trustee’s role in the GAFSP Governance Document as set forth under Section 5, which states:

*“The Trustee will provide to the Steering Committee regular reports on the financial status of the Trust Fund, as set forth in the Contribution Agreements.”*

Section 9 of the Standard Provisions in the Contribution Agreements for the Public Sector Window states as follows:

*“The Trustee shall maintain separate records and ledger accounts in respect of the Trust Fund funds deposited in the Trust Fund and disbursements made therefrom. The Trustee shall report to the Steering Committee annually unless otherwise agreed between the Trustee and the Steering Committee, on the status of Allocations of funding recorded by the Trustee, commitments and transfers from the Trust Fund and receipts of funds in the Trust Fund.”*

This report covers the financial status of the GAFSP Trust Fund as of December 31, 2022.

## GAFSP Trust Fund Financial Summary as of December 31, 2022

### ***Pledges and Contributions:***

A pledge represents a contributor's expression of intent to make a contribution. Contributors finalize their pledges by way of a countersigned Contribution Agreement/Arrangement.

As of December 31, 2022, contributions and pledges to the Public Sector Window of the Trust Fund totaled USDeq. 2,120.4 million. Of this amount, USD 2,045.1 million has been received by the Trustee in cash.

### ***Investment Income:***

As of December 31, 2022, the Trust Fund earned investment income of approximately USD 66 million on the liquid balances of the Trust Fund and investment income received from Supervising Entities.

### ***Funding Approvals:***

The cumulative funding decisions made by the GAFSP Steering Committee ("Steering Committee") through December 31, 2022, totaled USD 1,724.7 million, of which USD 1,587.2 million represents allocations for projects, USD 77.2 million for Supervising Entity fees, USD 41.1 million for Trustee and Coordination Unit administrative budget, and USD 19.2 million for monitoring and evaluation.

### ***Cash Transfers:***

The Trustee has transferred a total of USD 1,320.3 million up to December 31, 2022, including USD 1,186.5 million related to projects.

### ***Funds Held in Trust:***

*Funds Held in Trust*<sup>1</sup> reflect contributions paid-in from contributors, and investment income earned less cash transfers. Funds Held in Trust as of December 31, 2022, amounted to USD 790.8 million.

### ***Funds Available for Steering Committee Funding Decisions:***

Funds available to support Steering Committee funding decisions amounted to USD 386.4 million as of December 31, 2022.

---

<sup>1</sup> Funds Held in Trust represents balance of cash, investments and unencashed promissory notes (if any) as of the reporting date.

- In addition, the Trustee executed a contribution agreement with Spain for EUR 5 million.
- Under existing multi-year contribution agreements with Germany, funds totaling EUR 24.9 million were deposited into the Trust Fund.

### 3. Asset Mix and Investment Income

#### ASSET MIX

Cash assets held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. The assets in the Pool are managed in accordance with the investment strategy established for all trust funds administered by the World Bank.

The Trust Fund balance is currently invested across three of the Pool’s investment model portfolios (“Model Portfolio 0” (MP0) with an investment horizon of up to three months, “Model Portfolio 1” (MP1) with an investment horizon of one year, and “Model Portfolio 2” (MP2) with an investment horizon of three years). While MP0 has the objective of ensuring timely availability of funds to meet the short-term cash flow needs, MP1 and MP2 aim to enhance returns subject to capital preservation with a high degree of confidence (based on statistical models) over the respective investment horizons. Preservation of capital is the primary investment objective. Consequently, the Trust Funds investment portfolios are managed to conservative overall risk tolerance parameters.<sup>2</sup>

The Trust Fund assets are invested in high grade fixed income and money market instruments. Currently, these instruments include high quality securities that are issued by sovereign governments, government agencies, as well as multilateral and other official institutions. In addition, eligible instruments include asset-backed and agency-guaranteed mortgage-backed securities, as well as swaps and a range of other derivative instruments related to investments, which are used to manage the interest rate risk. Figure 1 below presents the portfolio allocation by asset class as of December 31, 2022.

*Note: The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio.*

<sup>2</sup> Generating enhanced investment returns while adhering to the investment objective of capital preservation and ensuring sufficient liquidity to meet foreseeable cash flow needs is undertaken within a conservative risk management framework which limits the estimated average loss to the portfolio in the worst 1% of loss events. The Conditional Value-at-Risk (CVaR) measure is the primary risk constraint used in the management of trust fund model portfolios. MP1 and MP2 have 99% CVaR measures of no greater than -0.25% and -1.00%, respectively.

## INVESTMENT RETURNS

The Trust Fund liquid portfolio earned approximately USD 66 million<sup>3</sup> in investment income since inception. The portfolio returns during calendar year 2022 were 0.40%. Persistent inflationary trends for most of 2022 led to unprecedented monetary policy action by central banks, including the United States Federal Reserve. This led to heightened volatility and negative performance across all fixed income assets until inflation expectations cooled a bit as the year ended. However, market sentiment is negative, and the portfolio is positioned to remain duration neutral. At current valuations, the forward-looking scenarios look positive for long-term portfolios.

## ESG SUMMARY REPORT – GLOBAL AGRICULTURE AND FOOD SECURITY PROGRAM INVESTMENT PORTFOLIO

As per the investment management strategy implemented by the World Bank, the funds held in trust benefit from the approach to Sustainable and Responsible Investment (SRI), which considers and incorporates Environmental, Social, and Governance (ESG) factors into the Trustee’s investment processes. The implementation of ESG Integration falls within the purview of existing authorizations by the World Bank Board. Based on the endorsement by World Bank management, starting from July 2019, the Trustee has applied ESG Integration as the default SRI approach for all portfolios managed by the World Bank, including the GAFSP Trust Fund assets.

Considering and incorporating ESG factors into investment processes should, all things being equal, lead to portfolios that have stronger ESG profiles compared to portfolios that do not explicitly consider these ESG issues. ESG Integration has become part of the existing investment processes and is intended to help fulfil the existing investment objectives. The application of ESG Integration as part of the investment process would not involve any changes to the current investment objectives or risk limits for the GAFSP Trust Fund portfolio.

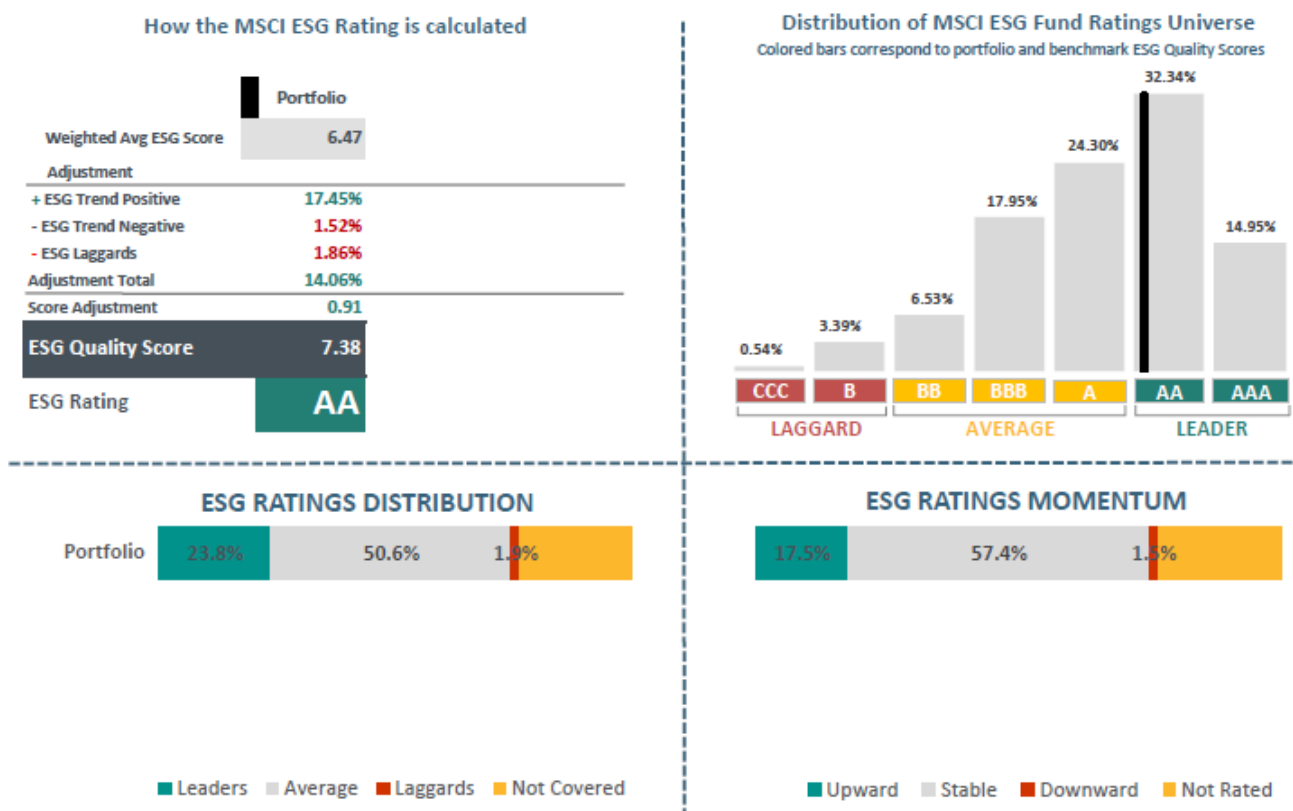

<sup>3</sup> Includes investment income received from SEs

The GAFSP investment portfolio is primarily comprised of short-term high-grade fixed-income securities (sovereign, supranational and agency securities, and bank deposits), and as of December 31, 2022, the portfolio has an ESG Quality Score\* of 7.38 and an ESG Rating\* of AA. Based on its ESG positioning in the MSCI ESG Fund Ratings Universe (upper right of Figure 1), which is deemed to be the more consistent reference indicator, GAFSP’s investment portfolio falls in the top decile of the ratings universe. This reflects high capability of GAFSP portfolio’s holdings in terms of managing key medium to long term risks and opportunities arising from Environmental, Social and Governance factors.

Figure 1: MSCI ESG Portfolio Summary – Global Agriculture and Food Security Program Trust Fund

\* Note: ESG Quality Score is based on MSCI ESG Ratings and measured on a scale of 0 to 10 (worst to best) following a rule-based methodology. ESG Ratings Momentum represents the percentage of a portfolio’s market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment. The ESG Quality Score is calculated as a weighted average of ESG scores of individual holdings adjusted by ESG Ratings Momentum and ESG laggards (if any). The weight applied to the individual ESG scores is determined by the portfolio weight of individual holdings as of the reporting date. Based on the above, the ESG Quality Score, which is subject to potential skewing effect from any factor in the calculation, could slightly vary between different reporting dates along with changes in individual holdings and their portfolio weights as well as changes in ESG Ratings Momentum. Please see details on MSCI ESG Ratings Methodology [here](#).
