<sup>a/</sup> GCFTF balances are invested in a capital preservation investment tranche ("Model Portfolio 1") which is managed to an objective of a very low probability of losses over a time horizon of 1 year. Gains or losses reported in quarterly or other interim reports may show mark-to-market-losses that may or may not be realized at the end of the investment horizon.

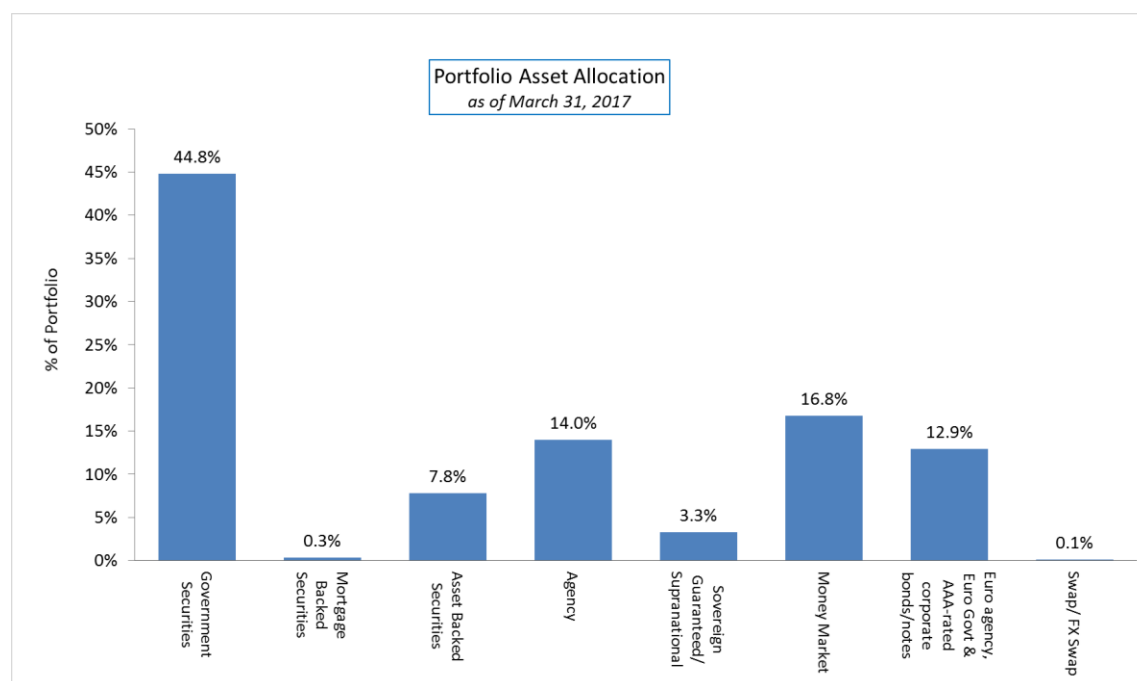

<sup>b/</sup> calculations include funding decisions reported by the Secretariat which are not subject to verification by the interim trustee.

<sup>1</sup> Funding Decisions of the GCF are reported for informational purposes only, based on information available to the Interim Trustee, and may be subject to revision or further confirmation by the GCF Secretariat.

## 4. Asset Mix and Investment Income

### ASSET MIX

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. Within this Pool, GCF funds are invested in a short term, high quality fixed income portfolio with an investment horizon of one year. As of March 31, 2017, the largest allocations by asset class were to government securities, agency, and Euro agency/Govt and AAA-rated corporate bonds, as well as asset backed and money market securities.

### INVESTMENT INCOME

The GCF Trust Fund balances are invested in accordance with the investment strategy established for all trust funds administered by the World Bank. On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. GCF Trust Fund balances are managed such that the expected maximum loss, as measured by the 99% CVaR, is not to exceed 1% at the portfolio’s investment horizon. The 99% CVaR represents the average portfolio loss in the worst 1% of loss cases.

The investment return on GCF Trust Fund balances during the CY 17 (Jan 1, 2017 to March 31, 2017) was 0.34%. The performance of United States short- and medium-term sovereign bonds contributed most significantly to investment performance of the portfolio during the year.
