Introduction

The information contained in this report is prepared based on financial information as of March 31, 2019, except where indicated otherwise.

The Global Environment Facility (GEF) was established in 1994 as an independent financial mechanism for providing grants and concessional funding to cover the incremental or additional costs of measures to assist in the protection of the global environment and to promote environmental sustainable development. Today, the GEF is the largest funder of projects focused on global environmental challenges and a global partnership among 183 countries, international institutions, non-governmental organizations, and the private sector. It provides grants for projects related to the following main areas: (i) biodiversity, (ii) climate change (mitigation and adaptation), (iii) international waters, (iv) land degradation, (v) ozone layer depletion, and (vi) persistent organic pollutants.

The report is produced by the Trustee in accordance with the Trustee's role in the GEF Trust Fund as set forth in Annex B of the GEF Instrument paragraph 4 (b) which states:

“The responsibilities of the Trustee shall include in particular [...] the financial management of the Fund, including investment of its liquid assets, the disbursement of funds to the implementing and other executing agencies as well as the preparation of the financial report regarding the investment and use of the Fund's resources [...]”

This report provides (i) a snapshot of the financial situation of the GEF Trust Fund since its inception to March 31, 2019, and recent developments since April 1, 2019; (ii) the details of financial activities of the GEF Trust Fund; (iii) Update on GEF-7 replenishment status.

Cash transfers were made to GEF Agencies on an as-needed basis to meet their projected disbursement requirements. Funds Held in Trust reflect financial activities related to new contribution payments (cash and promissory notes), encashment of promissory notes, investment income, cash transfers, and the revalued balance of promissory notes at month-end. Noting that Contributing Participants are in the process of formalizing their GEF-7 pledges by depositing their first installment payments, Funds Held in Trust, including the reserve amount of USD 240 million, total USD 5,165 million as of March 31, 2019, 31% of which represents unencashed promissory notes.

Funds available to support Council or CEO decision amounted to USD 850 million as of March 31, 2019. This represents an increase of USD 561 million compared to September 30, 2018.

¹ Does not include co-financing under the GEF Pilot Program.

UPDATE TO THE GEF-7 REPLENISHMENT AS OF MAY 24, 2019

The Seventh Replenishment of the GEF (GEF-7) became effective on February 5, 2019, in accordance with Paragraph 7(a) of the GEF-7 Replenishment Resolution, which states that effectiveness is triggered on the date that the Trustee has received Instruments of Commitment (IoCs) or Qualified Instruments of Commitment from Contributing Participants whose combined contributions aggregate to not less than 60%, or SDR 1,409 million, of the total contributions to GEF-7. Full effectiveness was triggered on February 5, 2019 by the submission of IoCs from 24 Contributing Participants whose contributions represent SDR 1,452 million.

Instruments of Commitment (IoCs). Since the adoption of the GEF-7 Replenishment Resolution to May 24, 2019, 29 Contributing Participants have deposited their IoCs in the form and substance as agreed under the GEF-7 Replenishment Resolution, representing 99.23% of the total GEF-7 pledges. Table 1 shows the details of the status of IoCs received by the Trustee as of May 24, 2019.

RESTRICTED RESOURCES

Restricted resources represent funds received from Contributing Participants but not available for funding decisions by the GEF Council and the GEF CEO.

As of March 31, 2019, restricted resources amounted to USD 240 million representing financial reserves. Approximately 80% of total GEF-6 and GEF-7 resources, i.e., installment receivables, unencashed promissory notes, and IOCs not yet deposited, are in non-USD currencies, while the funding decisions are made in US dollars.

An adverse movement in exchange rates such as strengthening of the US dollar against major contribution currencies could adversely affect the resources available for payments against approved funding decisions. To absorb the negative impact of exchange rate movements, the Trustee maintains a foreign exchange reserve. The appropriate level of reserve is determined by the Trustee for every replenishment and is continuously monitored after taking into account projected contribution payments and estimated disbursements. Following the full effectiveness of GEF-7, the Trustee is in the process of determining an adequate level of FX reserve under GEF-7.

2b. Asset Mix and Investment Income

The undisbursed cash balance of the GEF Trust Fund is maintained in a commingled investment portfolio (“Pool”) for all trust funds managed by IBRD. The Pool is managed actively and conservatively with capital preservation as the over-arching objective.

ASSET MIX

GEF Trust Fund assets are invested across three of the World Bank Trust Fund’s investment model portfolios, (“Model Portfolio 0” for short term working capital needs, “Model Portfolio 1” with an investment horizon of one year, and “Model Portfolio 2” with a broader investment universe and an investment horizon of three years). The investment objectives for the GEF Trust Fund are to optimize investment returns subject to preserving capital and maintaining adequate liquidity to meet foreseeable cash flow needs, within a conservative risk management framework². While future returns will depend on market conditions, the Trust Fund Investment Pool is actively monitored and adjusted to preserve donor funds over the investment horizons. Over shorter periods, however, market volatility may result in negative actual or ‘mark-to-market’³ returns. Overall, the GEF Trust Fund cumulative returns have been driven by its investment in longer-term model portfolios, which may be exposed to higher volatility in returns over shorter periods, but are expected to have higher returns over longer periods.

By asset class⁴, the largest allocations are to government securities, mortgage backed securities and cash and cash equivalents.

² Risk tolerance is defined as the expected maximum loss, as measured by the Conditional Value-at-Risk (CVaR), at the portfolio’s investment horizon, not to exceed 1% at portfolio’s investment horizon, with 99% confidence.

³ Mark-to-market gains or losses represent unrealized gains or losses resulting from changes in the value of securities in the portfolio which have not yet been sold.

⁴ Covered Bonds are securities issued by banks and mortgage institutions which provide additional protective layer to the investors wherein the investor has recourse to the issuer and collateral. In September 2018 report, covered bonds were clubbed under Govt securities.

INVESTMENT INCOME

Cumulative investment income earned since the beginning of GEF Pilot phase through March 31, 2019 is USD 1,440 million. In the GEF-7 period the investment income received is USD 85 million, representing a 2.3% average return.

INVESTMENT RETURNS

GEF Trust Fund investment returns for calendar year 2018 were 1.98%, an increase compared to year 2017.

Returns for the first three months of 2019 were 1.01%, buoyed by lower yields and rising Libor rates. The investment portfolio has maintained a defensive stance since early 2016, with duration generally remaining low for time horizon across all model portfolios.

*non-annualized investment returns as of March 31, 2019
