Introduction

The Global Infrastructure Facility (GIF) is a global open platform that facilitates the preparation and structuring of complex public-private partnerships to enable mobilization of private sector and institutional investor capital for infrastructure. The GIF platform coordinates and integrates the efforts of Multilateral Development Banks, private sector investors and financiers, and governments interested in infrastructure investment in Emerging Markets and Developing Economies.

The GIF Trust Fund was established in March 2015. This report covers the financial status of the GIF Trust Fund¹, and is produced by the Trustee in accordance with the Trustee's role in the GIF Partnership Framework, as set forth under Section D, which states:

“The Trustee will provide to the Governing Council regular reports on the financial status of the Trust Fund.”

In addition, Section 7 of the Standard Provisions in the Administration Agreement/Arrangement states as follows:

“The Trustee will maintain separate records and ledger accounts in respect of the funds deposited in the GIF Trust Fund and transfers made therefrom. The Trustee will report to the Governing Council on the financial status of the Trust Fund every six months (or at such other frequency as the Trustee and the Governing Council may agree), in accordance with the provisions set out in the GIF Partnership Framework and the GIF Operating Guidelines, including information on the status of Contributions, investment income, commitments, transfers and funds available for allocation of funding by the Governing Council and/or the Management Unit, as applicable.”

¹ This report does not include financial information related to contributions to the GIF provided through other channels (e.g. via a Single Donor Trust Fund).

3. Asset Mix and Investment Income

ASSET MIX

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. Within this pool, the GIF funds are invested in a short term, high quality fixed income portfolio with an investment horizon of up to one year.

The investment objectives for the GIF Trust Fund are to optimize investment returns subject to preserving capital and maintaining adequate liquidity to meet foreseeable cash flow needs, within a conservative risk management framework³.

By asset class, as of June 30, 2023, the portfolio is concentrated in government securities, cash & money market instruments, and agencies.

INVESTMENT RETURNS

The GIF funds are invested in accordance with the investment strategy established for all the trust funds administered by the World Bank. The GIF Trust Fund portfolio has returned 2.45% for the first six months of calendar year 2023 and earned approximately USD 6.92 million in investment income since inception.

³ Risk tolerance is defined as the expected maximum loss, as measured by the Conditional Value-at-Risk (CVaR), at the portfolio’s investment horizon, not to exceed 1% at portfolio’s investment horizon, with 99% confidence.

Investment performance of the portfolio during the quarter was driven mainly by the path of interest rates as indicated by the forward guidance from the Federal Open Market Committee (FOMC) that has at least signaled to keep the monetary conditions tight and restrictive. U.S. Treasury yields rose as investors continued to reprice short-term interest rates higher in the wake of strong economic data and persistently high inflation. Driven by the Fed's new policy rate path, the US yield curve soared to reach its highest point in the current cycle.

ESG SUMMARY REPORT – GLOBAL INFRASTRUCTURE FACILITY TRUST FUND (GIF) INVESTMENT PORTFOLIO

As per the investment management strategy implemented by the World Bank, the funds held in trust benefit from the approach to Sustainable and Responsible Investment (SRI), which considers and incorporates Environmental, Social, and Governance (ESG) factors into Trustee’s investment processes. The implementation of ESG Integration falls within the purview of existing authorizations by the World Bank Board. Based on the endorsement by the World Bank management, starting from July 2019, the Trustee has applied ESG Integration as the default SRI approach for all portfolios managed by the World Bank, including for the GIF Fund assets.

Considering and incorporating ESG factors into investment processes should, all things being equal, lead to portfolios that have stronger ESG profiles compared to portfolios that do not explicitly consider these ESG issues. ESG Integration has become part of the existing investment processes and is intended to help fulfil the existing investment objectives. The application of ESG Integration as part of the investment process would not involve any changes in the current investment objectives or risk limits for the GIF Fund portfolio.

The GIF Fund investment portfolio is primarily comprised of short-term high-grade fixed-income securities (sovereign, supranational and agency securities and bank deposits), and as of June 30, 2023, the portfolio has an ESG Quality Score* of 6.68 and an ESG Rating* of A. Based on its ESG positioning in the MSCI ESG Fund Ratings Universe (upper right of Figure 1), which is deemed to be the more consistent reference indicator, GIF Fund’s investment portfolio falls among the top of the average-rated ratings universe. This reflects high capability of

GIF Fund portfolio’s holdings in terms of managing key medium to long term risks and opportunities arising from Environmental, Social and Governance factors.

Figure 1: MSCI ESG Portfolio Summary – Global Infrastructure Facility Trust Fund

Note: ESG Quality Score is based on MSCI ESG Ratings and measured on a scale of 0 to 10 (worst to best) following a rule-based methodology. ESG Ratings Momentum represents the percentage of a portfolio’s market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment. The ESG Quality Score is calculated as a weighted average of ESG scores of individual holdings adjusted by ESG Ratings Momentum and ESG laggards (if any). The weight applied to the individual ESG scores is determined by the portfolio weight of individual holdings as of the reporting date. Based on the above, the ESG Quality Score, which is subject to potential skewing effect from any factor in the calculation, could slightly vary between different reporting dates along with changes in individual holdings and their portfolio weights as well as changes in ESG Ratings Momentum. Please see details on MSCI ESG Ratings Methodology [here](#).
