## Introduction

The Global Infrastructure Facility (GIF) is a global open platform that facilitates the preparation and structuring of complex public-private partnerships to enable mobilization of private sector and institutional investor capital for infrastructure. The GIF platform coordinates and integrates the efforts of Multilateral Development Banks, private sector investors and financiers, and governments interested in infrastructure investment in Emerging Markets and Developing Economies.

The GIF Trust Fund was established in March 2015. This report covers the financial status of the GIF Trust Fund<sup>1</sup>, and is produced by the Trustee in accordance with the Trustee's role in the GIF Partnership Framework, as set forth under Section D, which states:

*“The Trustee will provide to the Governing Council regular reports on the financial status of the Trust Fund.”*

In addition, Section 7 of the Standard Provisions in the Administration Agreement/Arrangement states as follows:

*“The Trustee will maintain separate records and ledger accounts in respect of the funds deposited in the Trust Fund and transfers made therefrom. The Trustee will report to the Governing Council on the financial status of the Trust Fund every six months unless otherwise agreed between the Trustee and the Governing Council, including information on the status of Contributions, investment income, commitments, transfers and funds available for allocation of funding by the Governing Council and/or the Management Unit, as applicable.”*

<sup>1</sup> This report does not include financial information related to contributions to the GIF provided through other channels (e.g. via a Single Donor Trust Fund).

### 3. Asset Mix and Investment Income

#### ASSET MIX

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. Within this pool, the GIF funds are invested in a short term, high quality fixed income portfolio with an investment horizon of up to one year.

On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. Funds are managed such that the expected maximum loss, as measured by the CVaR, at the portfolio’s investment horizon, is not to exceed 1% with 99% confidence.

**Note:**

\* The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio.

#### INVESTMENT RETURNS

The GIF funds are invested in accordance with the investment strategy established for all the trust funds administered by the World Bank. The GIF Trust Fund portfolio has returned 1.07% through the calendar year to December 31, 2020 and earned approximately USD 4.09 million in investment income since inception.
