### Introduction

The information contained in this report is prepared based on financial information of the Least Developed Countries Fund as of September 30, 2022.

The LDCF was established following the decision of the Conference of the Parties to the United Nations Framework Convention on Climate Change (the "UNFCCC") at its Seventh Session ("COP 7") in November 2001 to invite the Global Environment Facility ("GEF") to operate such a fund (Decision 7/CP.7 of the UNFCCC). At its May 15-17, 2002 biannual meeting, the GEF Council (the "Council") approved the arrangements proposed for the establishment of such a fund and invited IBRD to act as its Trustee (GEF/C.19/6).

The report is produced by the Trustee in accordance with the Trustee's role as set forth in the paper entitled Arrangements for the Establishment of the New Climate Change Funds (GEF/C.19/6) which states:

"[...] the World Bank would be responsible for the financial management of each fund, including: [...] (iv) the preparation of financial reports regarding the investment and use of the funds' resources; and (v) regular reporting to the Council on the status of the funds' resources."

This report provides (i) a snapshot of the financial situation of the LDCF Trust Fund since its inception to September 30, 2022; (ii) the status of pledges and contributions, and (iii) the details of financial activities of the LDCF Trust Fund.

### 3. Investment Management - Asset Mix and Investment Income

#### ASSET MIX

LDC Trust Fund assets are invested across three of the World Bank Trust Fund's investment model portfolios, ("Model Portfolio 0" for short-term working capital needs, "Model Portfolio 1" with an investment horizon of one year, and "Model Portfolio 2" with a broader investment universe and an investment horizon of three years). The investment objectives for the LDC Trust Fund are to optimize investment returns subject to

preserving capital and maintaining adequate liquidity to meet foreseeable cash flow needs, within a conservative risk management framework<sup>1</sup>. While future returns will depend on market conditions, the Trust Fund Investment Pool is actively monitored and adjusted to preserve donor funds over the investment horizons. Over shorter periods, however, market volatility may result in negative actual or 'mark-to-market'<sup>2</sup> returns. Overall, the LDC Trust Fund cumulative returns have been driven by its investment in longer-term model portfolios, which may be exposed to higher volatility in returns over shorter periods but are expected to have higher returns over longer periods.

By asset class, the largest allocations as of September 30, 2022 are to cash and cash equivalents.

#### **INVESTMENT RETURNS**

The LDCF Trust Fund liquid portfolio (which totaled approximately USD 825.07 million at end-September 2022) earned USD 73.49 million in investment income since inception. The portfolio returns over the first nine months of CY22 were -2.06% due to steepening of the yield curve which negatively affected returns under Model Portfolio 2.

<sup>&</sup>lt;sup>1</sup> Risk tolerance is defined as the expected maximum loss, as measured by the Conditional Value-at-Risk (CVaR), at the portfolio's investment horizon, not to exceed 1% at portfolio's investment horizon, with 99% confidence.

<sup>&</sup>lt;sup>2</sup> Mark-to-market gains or losses represent unrealized gains or losses resulting from changes in the value of securities in the portfolio which have not vet been sold.

### **ESG RATING OF THE LDCF TRUST FUND**

Starting from July 2019, the Trustee has applied ESG Integration as the default Sustainable and Responsible Investment (SRI) approach for all portfolios managed by the World Bank, including for the LDCF Trust Fund assets. The implementation of ESG Integration falls within the purview of existing authorizations by the World Bank Board, and thus would not involve any changes in the current investment objectives or risk limits for the LDCF Trust Fund portfolio.

Considering and incorporating ESG factors into investment processes should, all things being equal, lead to portfolios that have stronger ESG profiles compared to portfolios that do not explicitly consider these ESG issues. ESG Integration has become part of the existing investment processes and is intended to help fulfil the existing investment objectives without changes to the current investment objectives or risk limits of the portfolios for which it is used. Therefore, applying

ESG Integration as part of the investment process would not involve any changes in the current investment objectives or risk limits for the LDCF Trust Fund portfolio. The LDCF investment portfolio is primarily comprised of high-grade fixed-income securities (sovereign, supranational and agency securities, and bank deposits), and as of September 30, 2022, the portfolio has an ESG Quality Score<sup>3</sup> of 8.20 and an ESG Rating<sup>4</sup> of AA. Based on its ESG positioning in the MSCI ESG Fund Ratings Universe (upper right of below chart), which is deemed to be the more consistent reference indicator, LDCF's investment portfolio falls within the top decile of the ratings universe. This reflects high capability of LDCF portfolio's holdings in terms of managing key medium to long term risks and opportunities arising from Environmental, Social and Governance factors.

<sup>3/4</sup> ESG Quality Score is based on MSCI ESG Ratings and measured on a scale of 0 to 10 (worst to best) following a rule-based methodology. ESG Ratings Momentum represents the percentage of a portfolio's market value coming from holdings that have had an ESG Ratings upgrade, and those with a downgrade, since their previous ESG Rating assessment. The ESG Quality Score is calculated as a weighted average of ESG scores of individual holdings adjusted by ESG Ratings Momentum and ESG laggards (if any). The weight applied to the individual ESG scores is determined by the portfolio weight of individual holdings as of the reporting date. Based on the above, the ESG Quality Score, which is subject to potential skewing effect from any factor in the calculation, could slightly vary between different reporting dates along with changes in individual holdings and their portfolio weights chanaes in ESG Ratings Momentum.
