3. Asset Mix and Investment Income

ASSET MIX

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. Funds are managed such that the expected maximum loss, as measured by the CVaR, at the portfolio’s investment horizon, is not to exceed 1% with 99% confidence.

The portfolio allocation by asset class has the largest allocations to government securities and money market instruments.

Note: Mortgage Backed Securities allocation includes To-Be-Announced (TBA) contracts for which only Mark-to-market (MTM) is used to calculate the value of the position which, as a result, could be negative.

INVESTMENT RETURNS

The We-Fi funds are invested in accordance with the investment strategy established for all trust funds administered by the World Bank. The We-Fi funds are invested in a short term fixed income portfolio with an investment horizon of one year. The We-Fi Trust Fund portfolio has earned approximately USD 3.99 million in investment income since inception to February 28, 2019.
