### 3. Asset Mix and Investment Income

#### ASSET MIX

Funds held in trust by the World Bank (as the Trustee) are maintained in a commingled investment portfolio (the “Pool”) for all trust funds administered by the World Bank. Within this pool, the We-Fi funds are invested in a short-term, high quality fixed income portfolio with an investment horizon of up to one year. On July 1, 2015, the World Bank formally adopted the Conditional Value-at-Risk (CVaR) measure as the risk constraint in the management of trust funds. Funds are managed such that the expected maximum loss, as measured by the CVaR, at the portfolio’s investment horizon, is not to exceed 1% with 99% confidence.

The portfolio allocation by asset class has the largest allocations to government securities and money market instruments.

*Note: The negative position in swaps is primarily due to changes in foreign currency exchange (FX) rates in cross currency basis swaps. Such swap instruments are used to implement currency hedges on bond positions within the portfolio. These hedges remain in place.*

#### INVESTMENT RETURNS

The We-Fi funds are invested in accordance with the investment strategy established for all trust funds administered by the World Bank and has earned approximately USD 10.24 million in investment income since inception. The portfolio returns during the first two quarters of calendar year 2020 was 0.68% non-annualized.
